Belly Putters

Fitting and Assembly Techniques

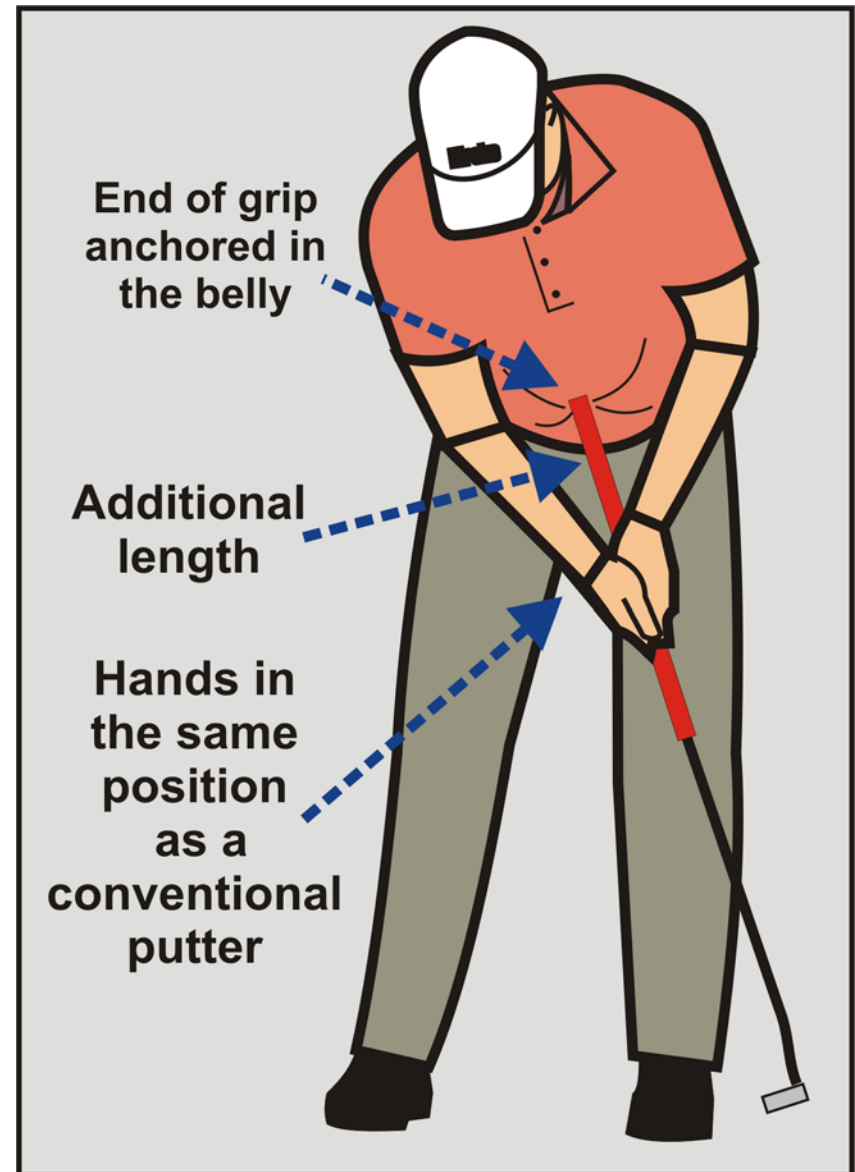

- What exactly is a belly putter?
- Belly putter history
- Belly putting techniques
- Choosing the right components for a good belly putter
- Assembly tips for this category of putters

Belly Putter Side View

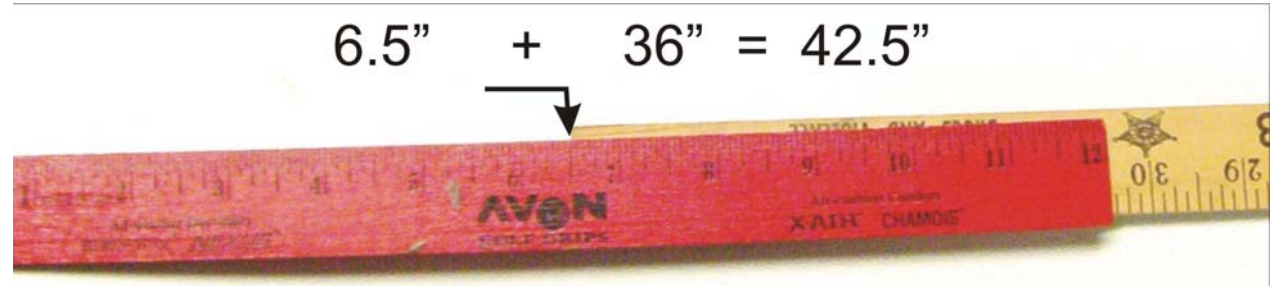

Belly Putter Front View

- Same Posture
- Same Stance
- Same Grip
- Simply an extension of a conventional putter

Two Ruler Method

Add the length from the end of the small ruler to the end of the yardstick to 36'' to determine what length belly putter you might need

Sorry to burst your bubble, "It's not new"

Choosing the right components for a good belly putter (head)

- Head weight (typically 385-400g)
- Universal hosel adapters adds 42g for mallet putters weighing 350-360g range
- Lie angle is normal

Choosing the right components for a good belly putter (shaft)

- Belly putter shafts range from 43” to 50”
- Conventional putter shafts can be used and extended, especially on existing putters or specialty curved putter shafts

Choosing the right components for a good belly putter (grip)

- Do you want one long putter grip or two pieces?
- Do you prefer round or flat (for alignment)?

Belly putter grip tips

- If using two grips, it requires a minimum spacing of 1.5” apart
- Use lots of solvent and work quickly to avoid getting the putter grip stuck half way
- In some cases may require build-up of masking tape underneath lower grip to prevent a gap
